CLEANSING CREAM - MILK.

There are specific products in form of emulsions made of oils and fats, strongly tensioactive, having a great cleansing power. The use of these liquids or creams makes the skin clear and degreased, ready for the makeup. The cleansing milk has to be removed after having been slightly massaged on the face. The cleansing can be completed with an alcoholic or alcohol free tonic that eliminates the traces of oil and milk remained on the skin. Then it is advisable to rinse with water to avoid leaving traces of dirt or product on the skin, that has to be left soft and clean, as not to leave the cotton soaked with tonic grey after the cleaning.

The milks and the cleansing creams have to have a neutral reaction or slightly acid, that is to say they don't have that to vary the natural acidity of the skin.
